Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/722,383

Applicant(s)

SALMI ET AL.

Examiner

Adam L. Basehoar

Art Unit

2178

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 06/25/07.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application
- ☐ Other: _____

DETAILED ACTION

1. This action is responsive to communications: The Amendment filed 06/25/07 to the Application filed 11/25/03.
2. The rejection of claim 31 under 35 U.S.C. 112 has been withdrawn as necessitated by Amendment.
3. The rejection of claims 28 and 29 under 35 U.S.C. 101 has been withdrawn as
4. Claims 1-32 remain rejected under 35 U.S.C. 102(e) as being anticipated by Furon et al (US-2006/0052118 03/09/06).
5. Claims 1-32 are pending in the case. Claims 1, 11, 22, 28, 29, and 31 are independent claims.

Information Disclosure Statement

6. The information disclosure statement (IDS) submitted on 06/25/07 has been considered by the examiner.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2178

8. Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Furon et al (US-2006/0052118 03/09/06).

-In regard to independent claims 1, 11, 22, 28, and 29, Furon teaches a device, method, system, and computer program product, for printing an electronic presentation, the method comprising steps for processing a presentation data (Paragraph 28: i.e. "multimedia messages"; Paragraph 34: "selected messages 21, 23, 24 make up for example a story...successively in time"), wherein the method comprises steps for forming at least one printable output (Paragraph 40: "a printer 16 produces the composite multimedia message")(Fig. 1: 16; "printer") from said electronic presentation of a single message (Paragraph 28: "of one...multimedia messages") that comprises multiple objects (Paragraph 28: "digital image, the text associated with said image and a sound or audio message"; Paragraph 31: "an initial multimedia message comprises a digital image, and either at least one text message and/or one sound message....still or animated (video clip)"), by defining combined page or separate pages for said printable objects (Paragraph 28: "automatic layout, on a single page, or even several pages, or one...multimedia messages"; Paragraph 40: "automatically lays out, on at least one page....composite multimedia message...from each transformed...message") whereby the printable output was formable into separate pages depending on removal of irrelevant objects (Paragraph 35; Paragraph 38: "only keeping one part of the text or text parts forming said initial messages" and "where the multimedia message comprises an image that is a video clip....determination...of a key image of said video clip...included in a composite...message"; Paragraph 39: "only the key parts of the initial messages are kept"), conversion of continuous objects into non-continuous objects (Paragraph 38: "where the multimedia message comprises an image that is a video

Art Unit: 2178

clip....determination...of a key image of said video clip...included in a composite...message”), and also based on upon a temporal aspect (Paragraph 1: “automatic layout is performed from analysis of various...messages....especially includes characteristics of time”; Paragraph 34: “sequential analysis”) and spatial aspect of said multiple objects (Paragraph 1: “automatic layout is performed from analysis of various...messages....especially includes characteristics of...contents, or even context”; Paragraph 35: “semantic analysis”; Paragraph 37: “relational analysis...correspondences to be established between images, texts, and sounds form each of the various selected...messages”),

-In regard to dependent claims 2 and 12, Furon teaches a step for defining a temporal aspect by an onset of each object in the presentation of said single message (Paragraph 1: “automatic layout is performed from analysis of various...messages....especially includes characteristics of time”; Paragraph 34: “selected messages 21, 23, 24 make up for example a story...successively in time” & “sequential analysis”; Paragraph 37: “relational analysis”).

-In regard to dependent claims 3, 13, 25, and 30, Furon teaches wherein from one to, in maximum, as many printable outputs are formed as there are printable objects in the presentation (Paragraph 40: “automatically lays out, on at least one page having a given format, the composite multimedia message” & “to perform a printing request....printing sheets less than or equal to the number...advantageously made”)(Fig. 4).

-In regard to dependent claims 4 and 14, Furon teaches wherein one or more objects are located in layout locations of the presentation (Paragraph 35: i.e. “semantic analysis”; Paragraph 37: i.e. “relational analysis”; Paragraph 40: “according to messages 38, 39, 40,.....as balloons”)(Fig. 4: e.g. 38, 39, 40 and 46, 47, 48).

-In regard to dependent claims 5, 15, 23, Furon teaches steps for studying a spatial aspect of each object by defining the layout location of each object of said single message (Paragraph 35: i.e. “semantic analysis”; Paragraph 37: i.e. “relational analysis”).

-In regard to dependent claims 6, 16, and 24, Furon teaches steps for combining objects into single output, if their layout locations differ from another (Paragraph 18: “layout if performed on one ore more pages”; Paragraph 40: “automatically lays out....six selected multimedia messages”)(Fig. 4), and otherwise keeping them on separated outputs (Paragraph 40: “When the composite....display per page”).

-In regard to dependent claim 7, Furon teaches printing said combined page or printing one or more of said separate pages (Paragraph 18: “layout performed on one or more page”; Paragraph 40: “The invention process thus enables...printing paper are thus advantageously made”).

-In regard to dependent claims 8 and 17, Furon teaches wherein the presentation is a multimedia message and an object is an appearance of a media object of one of the following

Art Unit: 2178

group: editable text, non-editable text, image, animation, video, streaming video, audio converted to image or to text (Paragraph 28: “digital image, the text associated with said image and a sound or audio message”; Paragraph 31: “still or animated (video clip)”).

-In regard to dependent claims 9, 21, and 27, Furon teaches wherein the printout was printed to a hard copy (Paragraph 29: “the printer 16 for example.....etc)(Fig. 1: 16).

-In regard to dependent claim 10, Furon teaches wherein the printable output forms a slide of a slide presentation (Fig. 4).

-In regard to dependent claims 18 and 26, Furon teaches means for communication through a wireless telecommunications network (Paragraph 29: “mobile terminal...for example GSM”)(Fig. 1).

-In regard to dependent claim 19, Furon teaches further comprising a camera (Paragraph 29: “cellphone equipped with a camera”).

-In regard to dependent claim 20, Furon teaches comprising means for displaying the presentation (Fig. 1: 18A: “display screen”; 16: “printer”).

-In regard to independent claim 31, Furon teaches a method for printing an electronic presentation, the method comprising steps for processing a presentation data (Paragraph 28: i.e.

Art Unit: 2178

“multimedia messages”; Paragraph 34: “selected messages 21, 23, 24 make up for example a story...successively in time”), wherein the method comprises steps for forming at least one printable output (Paragraph 40: “a printer 16 produces the composite multimedia message”)(Fig. 1: 16; “printer”) from said electronic presentation of a single message (Paragraph 28: “of one...multimedia messages”) that comprises multiple objects (Paragraph 28: “digital image, the text associated with said image and a sound or audio message”; Paragraph 31: “an initial multimedia message comprises a digital image, and either at least one text message and/or one sound message....still or animated (video clip)”), by defining combined page or separate pages for said printable objects (Paragraph 28: “automatic layout, on a single page, or even several pages, or one...multimedia messages”; Paragraph 40: “automatically lays out, on at least one page....composite multimedia message...from each transformed...message”) whereby the printable output was formable into separate pages depending on removal of irrelevant objects (Paragraph 35; Paragraph 38: “only keeping one part of the text or text parts forming said initial messages” and “where the multimedia message comprises an image that is a video clip....determination...of a key image of said video clip...included in a composite...message”; Paragraph 39: “only the key parts of the initial messages are kept”), conversion of continuous objects into non-continuous objects (Paragraph 38: “where the multimedia message comprises an image that is a video clip....determination...of a key image of said video clip...included in a composite...message”), and also based on upon a temporal aspect (Paragraph 1: “automatic layout is performed from analysis of various...messages....especially includes characteristics of time”; Paragraph 34: “sequential analysis”) and spatial aspect of said single message (Paragraph 1: “automatic layout is performed from analysis of various...messages....especially includes

Art Unit: 2178

characteristics of...contents, or even context”; Paragraph 35: “semantic analysis”; Paragraph 37: “relational analysis...correspondences to be established between images, texts, and sounds form each of the various selected...messages”), wherein the printout of the electronic presentation is delivered to the recipient and charged from the sender (Paragraph 18: “also the printing cost to be reduced...is selected”; Paragraph 29: “the server 14 communicates...with the printer....processing laboratories”; Paragraph 40: “perform a printing request...savings of printing paper are thus advantageously made”).

-In regard to dependent claim 32, Furon teaches wherein the printout is in one of the following forms: a varying sized paper, a postcard, a fax, a photograph (Paragraph 29: “the printer 16 for example.....etc).

Response to Arguments

9. Applicant's arguments filed 06/25/07 have been fully considered but they are not persuasive.

-In general the Applicant mainly argues that the newly amended claims differ from that of the Furon et al reference in that the Furon et al reference pertains to a plurality of multimedia messages supposed to a single message now claimed by Applicant. The Examiner respectfully disagrees with the Applicant. While the Examiner agrees that the Furon et al reference discusses processing a plurality of multimedia messages, the Examiner notes that the Furon et al reference taught the same processing steps for an individually selected multimedia message. Said individual multimedia message maintained a plurality of content objects that were processed into

Art Unit: 2178

a composite multimedia message based on time, contents, as well as context of the images and texts of the initial message. Regardless of how many multimedia messages were selected by the user, the same algorithm (Fig. 2) was used to process the objects of said multimedia message.

Please note the above rejection in regard to said newly claimed limitations. As currently claimed, the Examiner also believes that the single created composite multimedia message generated by Furon et al would read on the Applicant's "single message" limitation.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e. the principled flowcharts of Figs. 5A and 5B) are not specifically recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2178

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
